

test\_mazes.test\_classic  
\_goal\_cells

test\_mazes.test\_goal  
\_cells

test\_mazes.find\_tagged  
\_cells

```
graph LR; A["test_mazes.test_classic<br/>_goal_cells"] --> C["test_mazes.find_tagged<br/>_cells"]; B["test_mazes.test_goal<br/>_cells"] --> C;
```

The diagram illustrates a dependency or relationship between three code elements. On the left, there are two white rectangular boxes. The top box contains the text 'test\_mazes.test\_classic' followed by '\_goal\_cells' on a new line. The bottom box contains 'test\_mazes.test\_goal' followed by '\_cells' on a new line. On the right, there is a gray rectangular box containing the text 'test\_mazes.find\_tagged' followed by '\_cells' on a new line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both test functions on the left depend on or call the 'find\_tagged\_cells' function on the right.
